

Syscon COVID-19 Protocol Module

Ensure the Safety of Your Team and Custodial Population With Syscon's COVID-19 Protocol Module

Syscon has leveraged existing functionality in our system to offer a comprehensive COVID-19 protocol module that will help your team safely assess, identify, manage, and provide care to your custodial population.

We are offering this enhanced module to our client base **at no additional cost** to ensure that your agency has the tools it needs to deliver safe and effective care for your population. This module **works with all versions** of Syscon software.

COVID-19 Assessment

- 100% configurable questionnaires
- Assessment questions preconfigured based on current standards of centers for disease control
- Leverages existing assessment functions

Medical Isolation

- Schedule medical quarantines
- Track & document symptoms
- Manage housing and movements to comply with social distancing practices

Observations & Checks

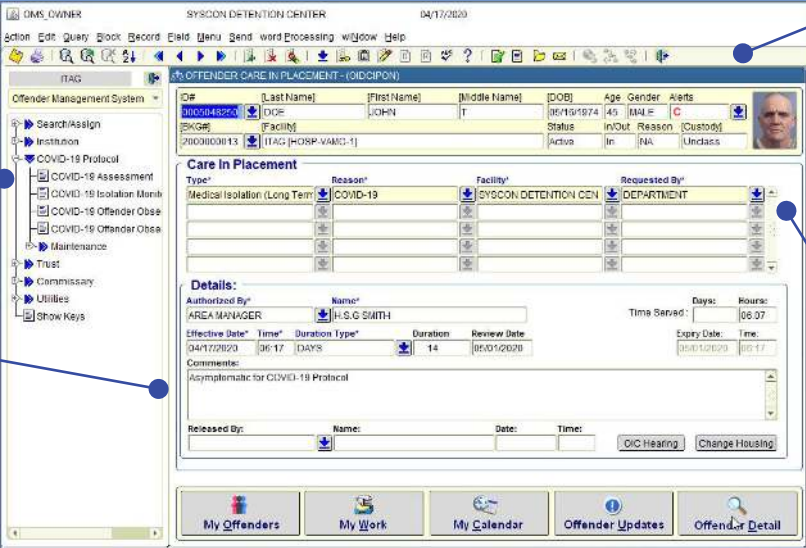

- Monitor symptom development
- Manage COVID-19 observations
- Mitigate the spread of infection in your facilities with proactive observation scheduling

Reach out to schedule a Webex demonstration: info@syscon.net

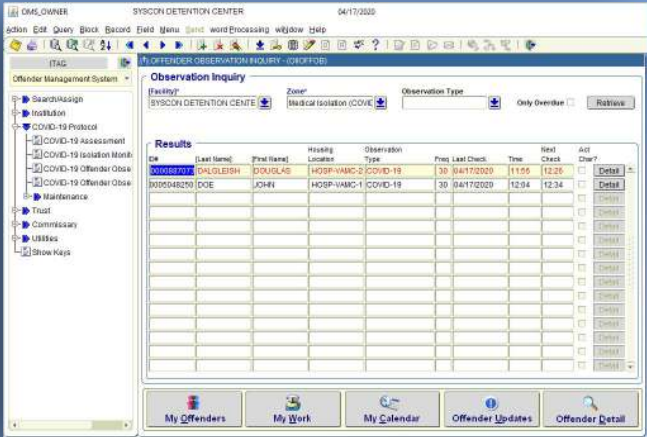

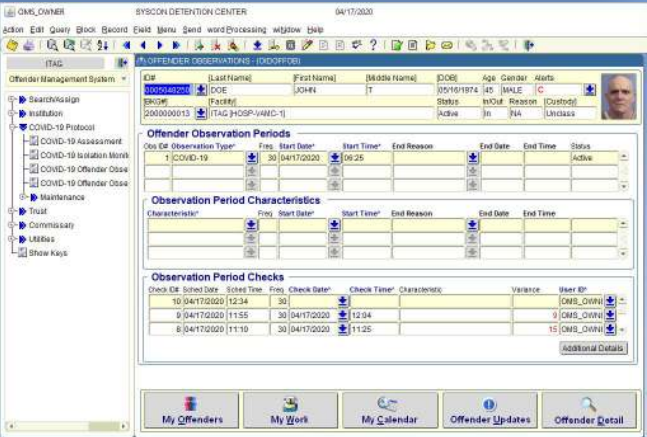

A range of screens take you from assessment to isolation to continuous observation

Track symptoms, monitor progression, and escalate as required

Leverage existing functionality and licensing for COVID-19-specific processes

Create medical isolation plans for individuals who have displayed symptoms

Syscon Is Here to Help

The Syscon team would like to thank our clients who are continuing to keep our communities safe during this time of crisis. If this module can help your agency, we'll work with your team to get this functionality up and running as quickly as we can.
